

Sandringham Sixth Form Blended Learning

All students who attend Sandringham Sixth Form require a laptop device.

Rather than a tablet device, research and experience has shown us that sixth form students find laptops invaluable. This reflects the increased duration and complexity of tasks in Sixth Form that are harder to accomplish with a smaller touch-screen device, including extended writing and coursework.

You can choose which laptop device you wish to bring to school, this might be a Windows Laptop, Chromebook or Mac Book. It is not necessary to purchase a new device if you have one which is in working order.

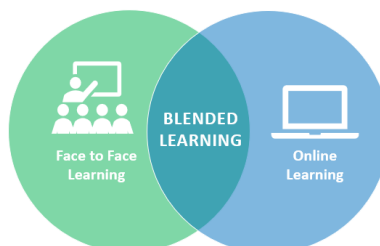

For some particular subjects, you will require a Windows PC or MacBook and **not** a Chromebook due to the specialist software you will use during the course of study. These subjects are:

- Computer Science
- Design & Technology: Product Design
- Media Studies
- Physics

By bringing your own laptop, you will have access to the following benefits that will support your learning:

- Access to the school WiFi network throughout the school with a high bandwidth connection to the Internet
- A Google Gmail email address to keep in touch with teachers and fellow students
- Unlimited storage on Google Drive
- The ability to collaborate on documents with teachers and fellow students via Google Workspace for Education tools
- Access to learning materials and lesson resources via Google Classroom
- Access to a range of digital learning resources

Our intention is to get you used to the normal ways of working in a university or employment environment before you leave school. Your laptop may not be used for every part of a lesson, though the ability to conduct research, access online resources and complete coursework and homework and pre-reading in some subjects will be crucial. This is what we call 'Blended Learning': new technologies are combined with traditional teacher instruction and media. The choice of which approach to use at a particular point in a lesson is down to the professional judgement and experience of your teacher.

Which device should I get?

Ideally, one that you already own (and are prepared to bring to school for lessons)!

Our minimum requirements are simple:

- At least a 13" screen
- At least a 3-hour battery life
- Wireless networking

Almost any reasonably modern laptop will suffice, particularly from the main brands of Acer, Apple, Asus, Toshiba, Lenovo, HP, Dell, etc. Chromebooks from various vendors are also completely suitable for sixth form work and integrate well with our GSuite for Education environment.

You will be given unlimited cloud storage space on Google Drive, meaning storage space on the device itself is less of an issue.

You should consider the weight of the device (you will be carrying it to and from school and between lessons) and battery life so that you are not constantly having to recharge it.

Insuring your device is up to you, but personal devices won't be covered by school insurance so you should consider coverage for accidental damage or theft if you think that is a risk. A robust carrying case is a wise investment in keeping the laptop safe.

We do not recommend specific vendors since prices are constantly changing. Vendors such as eBuyer.com typically offer good value on frequently changing stock and stores such as John Lewis have a reputation for good customer service and extended warranties.

What about affordability?

We do not want financial considerations to be a barrier to any student at Sandringham Sixth Form.

The 16 to 19 bursary fund provides support with educational expenses, and we have worked with bursary-eligible students over a number of years to equip them with laptops. The bursary application form is included in this Induction Pack and students need to apply as directed if they think that they may be eligible. It may take 6-8 weeks in September for the bursary decisions to be made and then funds distributed, all teachers will be aware of this and will not demand a laptop for use. More information on the bursary is available here:

<https://www.gov.uk/1619-bursary-fund/overview>.

There is further information on the Sandringham School website:
